SUMMARY

CSE student (B.Tech '27) engineered building end-to-end web products with strong frontend execution and solid backend architecture. Developed scalable applications featuring role-based systems, real-time flows, and performance-driven UI. Transformed complex ideas into clean, functional products with attention to both system design and user experience.

TECHNICAL SKILLS

Core	JavaScript (ES6+), TypeScript, Python
Frontend	React.js, Next.js, Tailwind CSS, Framer Motion (responsive UI, animations with GSAP, ScrollReveal, Spline)
Backend	Node.js, Express.js (REST APIs, JWT Authentication, RBAC)
Databases	MongoDB, MySQL, Firebase (schema design, query optimization)
Tools & Workflow	Git, Github Actions, Postman, Vercel, Render, Railway, Netlify, Docker (basic usage)
AI / ML	scikit-learn, pandas, NumPy, Matplotlib
Familiar With	GraphQL, Django, AWS Basics, Supabase, Figma, Automations

PROJECTS

TurfBooking Platform | *MERN · JWT · RBAC · Role-Based Routing · Vercel CI/CD*

- Architected a full-stack turf marketplace with three role layers and 15+ pages; admins approve listings, managers track earnings, and customers book in real time. Engineered slot picker by implementing double-booking prevention mechanisms; automated refund calculation on cancellations and live card UI with format validation.
- Deployed via Vercel with GitHub-integrated CI/CD pipeline enabling automated builds on every push.

Coaching Dashboard | *React.js · Node.js · Express · MongoDB · Chart.js*

- Built an institute management platform covering four core modules—student records, batch scheduling, attendance tracking, and real-time analytics dashboards. Implemented Role-Based Access Control (RBAC) for admin and student portals with Chart.js-powered visual reporting on academic progress.

SmartMed — Disease Predictor | *Python · scikit-learn · Flask · pandas*

- Trained ML models for 40-60 diseases, achieving 70-80% accuracy, and exposed predictions via a Flask REST API. Implemented Agile sprint cycles to deliver features bi-weekly, improving time-to-market by 20%.

Building Developer Group | *React.js · Tailwind CSS · Responsive Design*

- Designed and delivered a client-facing showcase website for a real-estate developer group — responsive, brand-focused frontend presenting residential project portfolios.

Coffee Café Website | *HTML5 · CSS3 · JavaScript · GSAP*

- Crafted an immersive brand experience with GSAP-powered scroll animations and an animated menu showcase, demonstrating high-quality UI and motion design.

EDUCATION

B.Tech — Computer Science & Engineering · 2023 – 2027

C. K. Pithawalla College of Engineering & Technology, Surat, Gujarat

STRENGTHS & INTERESTS

Leadership & Collaboration · Systems Thinking & Architecture · AI-Assisted Development (Vibe Coding) · Ownership Mindset

Interests: Open Source · Full-Stack Product Development · Learning New Technologies by Building · Exploring AI-driven Applications
